So, you already know your way around

- HTML, CSS and Javascript
- Not necessarily, but ideally, PHP – basic knowledge

By the end of your internship, you should be able to

- Work effectively as part of a team, sharing information and files, keeping versions under control
- Understand responsive design frameworks
- Use JavaScript and CSS libraries
- Create cross-browser compatible webpages that meet accessibility standards and technical SEO requirements
- Produce a simple, cross-browser compatible and bugs-free portfolio website
- Use PHP to deploy your portfolio website

How are you going to learn to achieve all these

- Participating in daily stand-up meetings
- Working on current, real projects
- Working on your portfolio website
- Through mentorship sessions with front-end developers – daily for the first week – and then according to your needs, based on your progress
- Through weekly mentorship sessions with back-end developers
- Having three paid hours a week to learn, using resources at your choice/recommended by your mentors, and to put together your portfolio site

Suggestions for your goals – but feel free to adapt them to your circumstances

- At the end of the first day, you should be familiar with the project environment
- At the end of the second day, you need to be able to work with remote repository using Git on the command line
- At the end of the second month, you should be able to create responsive layouts using Bootstrap
- At the end of the second month, you should be able to create animations using CSS and jQuery
- By the end of the three months' internship, you should be comfortable helping new interns get settled in your position
- At the end of your internship, you will have your responsive, animated, and cross-browser compatible portfolio online

You're going to get our support to achieve your goals

- We'll help you get familiar with the project environment during the first day
- We'll offer daily mentorship sessions on front-end development for the first week
- And weekly mentorship sessions with back-end developers
- You'll get our feedback and support to make the best out of your portfolio project
